Chris.

Many thanks for the outreach. Any early Happy New Year to you. I am, indeed, coming out that way in a few weeks and am looking forward to meeting you.

As you may know, BP was one of the first oil and gas companies to recognize the urgency of the climate challenge and we intend to be part of the solution. We support a well designed price on carbon. We are proud of our role last year working with Governor Brown in California to develop and pass AB 398 - the cap and trade bill. As a result, we believe that we can achieve effective carbon policy by working together. That is why we want to engage in a quality conversation with you on the matter.

I will ask Denny Eliason to forward to you our principles. In the meantime, if you would like to set up a call, we would be happy to discuss this with you further.

Best regards,
PC

Hello Phil

Forgive me, I believe we've met in the past but it's likely been sometime since we spoke. Senator Carlyle indicated that you've been interested in carbon pricing this session and as you know, we're working closely with he and Senator Palumbo on a bill that should be introduced shortly.

I understand you'll be in WA in mid-January and I'd welcome the chance to connect with you and your team to get a sense of where you are on the concept generally and this proposal specifically. Meantime if your folks are interested and available to share any perspective or principles as we bring this first introduction to the conversation into shape, I'd be interested in that conversation. I've had extensive discussions with the WSPA folks and have their input but assume BP may have its own perspectives.

Thanks – hope you have a pleasant holiday.

Chris

Hey Chris:

Per Phil's request, please find a list of BP's principles around carbon. We are happy to arrange for a call with you sometime next week if you would like.

Warm Regards, Denny

Hey Denny

Understand you had an interesting discussion with our execs this week. Are you in Oly W-F this week to chat a bit more? Thanks...

Chris
